# OUR ACTIVITIES

Our services, broken down by end markets and managed according to a cross-functional approach, offer the most effective solution for clients, as they are tailored and designed based on the specific needs in each sector and field.

Our wide range of services and solutions also includes highly-specialized training programs to support our clients' expertise.

The know-how of each team, capable of operating locally without ever losing sight of the global perspective, has enabled us to consolidate our presence among the world's leading enterprises.

## INDUSTRY

We preserve the safety, reliability, and integrity of industrial assets throughout their life cycle and assess their compliance with national, international, and voluntary standards. We monitor and optimize supply chain quality across various industries, comprehensively supporting all power generation, transmission, and distribution technologies throughout the life cycle.

## CERTIFICATION

As an independent third party and accredited certification body, we attest that management systems, services, and people comply with specific standards.

Certification enables companies to access new markets, strengthen their corporate reputation, or ensure the efficiency and quality of their operations and improve performance along the value chain of their industry.

## CONSTRUCTION AND INFRASTRUCTURE

We offer the verification, inspection, and compliance services needed to plan and manage major construction and infrastructure projects. Our services are aimed at ensuring regulatory compliance and energy efficiency, enabling operational continuity and protecting the environment, people, and community by maximizing performance, from planning to asset management, right through to decommissioning.

VERITAS**

## MARINE & OFFSHORE

We examine the design, construction, and operations of ships and offshore assets, testing them against regulations to help build a safer, more sustainable, and digitized industry. We are pioneers in classification, safety, and performance, developing rules and guidelines to support maritime progress, offering our clients local expertise with global reach.

## CONSUMER PRODUCTS

We offer a wide range of TIC (Testing, Inspection, and Certification) services aimed at ensuring the regulatory compliance, quality, safety, and performance of a wide range of consumer goods. We work to improve supply chain efficiency by optimizing costs, mitigating risks, and reducing production time to accelerate product time-to-market.

## AGRI-FOOD AND COMMODITIES

We increase transparency and verify the composition, quality, and quantities of commodities throughout the value chain, from drilling to marketing, from grower to consumer.

We facilitate international buying and selling, protecting citizens from consuming poor-quality products by checking the compliance of imports.

IMPACTS

Bureau Veritas Nexta is the ideal partner in **business process optimization** consulting.

We firmly believe in the “know to plan” and “analyze to detect” approach.

Our solutions are designed and developed to meet the widest range of needs and requirements, including **verification, control, measurement, monitoring, analysis, and study** activities.

Through business process analysis and optimization, we can ensure the best strategy throughout the investment life cycle, from implementation to decommissioning.

- **Support during the feasibility study and design phases**

---

- **Protecting the integrity of facilities and infrastructure**

---

- **Proper use and operation of equipment and machinery**

---

- **Compliance and conformity with national and international regulations**

---

- **Performance improvement and process optimization**

We are the trusted partner in **integrated engineering services** to large companies, organizations, and SMEs seeking a sustainable approach to successfully managing **environmental, social, economic, and governance impacts**.

The main aim of integrated engineering services is to support clients at every stage of project development through activities such as: Project Management, Project Construction Management, and Construction Supervision, in both civil and industrial fields. Our experts support clients in assessing and managing risks related to the construction phase of the asset.

- **Project management**

---

- **Project construction management**

---

- **Construction management and coordination**

---

- **Safety in the construction phase**

---

- **Coordination in construction and infrastructure**

We help clients to improve their **ESG (Environmental, Social, and Corporate Governance) rating**.

Our solutions are designed to support companies at every stage of integrating sustainability into their strategies, brands, and processes.

We provide comprehensive strategic advice and support to assess their current position, define a suitable roadmap, and identify the most appropriate methods and tools.

We also assist clients in developing a customized ESG reporting pathway and assist them in communicating and implementing their strategies effectively.

- **Assessment of position**

---

- **Strategic definition of ESG roadmap**

---

- **Identification of successful methods and tools**

---

- **Communication of sustainability strategies**

# TRAINING

## FUNDABLE TECHNICAL COURSES

NEXTA

Enhancing professional skills through a solid continuing education process is a key asset for both business success and individual development.

Bureau Veritas Nexta translates its expertise into **highly professionalizing training opportunities**. We offer a wide range of technical courses in multiple areas — including Management Systems, HSE, and Industrial Technology — covering different methodologies and topics that are always on the cutting edge.

The training we offer, available across Italy, can be financed through **Interprofessional Funds** made available to companies.

- **Virtual and in-person courses**

---

- **Corporate classroom training**

---

- **Practical training courses in the field**

---

- **E-learning**

# ABOUT US

## SHAPING YOUR NEXT FUTURE

Bureau Veritas Nexta supports its clients in **managing risk** throughout the life cycle of infrastructure, facilities, industrial, or civil assets, by delivering **consultancy** and **engineering services** geared towards **strategic planning and sustainability**.

Our purpose is to prevent risks, consolidate and evolve the business of our clients, by enhancing their contribution to the community and the environment.

Thanks to multidisciplinary technical expertise and to a streamlined and dynamic approach, Bureau Veritas Nexta provides clients with innovative instruments and solutions so that they can achieve strategic **compliance, performance, and ESG** goals.

A **Bureau Veritas Group Company**, it expresses all the know-how and history of an important international group in its consultancy services, flexibly and effectively fulfilling the present and future demands of a constantly evolving market.
